ADVANCED HTML INTERACTIVE WEB PAGES
THREE DAYS

Prerequisites

This course is intended for those who have a working knowledge of Internet basics and a basic understanding of [HTML](#) tags and Web Page interaction.

Who Should Attend

This course is for the Internet Web Publisher who wishes to add interactive and dynamic web pages.

Course Description

Advanced HTML Interactive Web Pages is intended for the web page designer who wishes to enhance his creations with Java applets, client side scripting, ActiveX objects, image mapping, forms, CGI scripts and other techniques. While this course is not intended to teach all these environments, the student will learn how to use these tools. The instructor will bring to class example scripts, applets, objects etc.
